

## EXPERIMENT-1

### Aim

Design an ER diagram for an Indian e-commerce platform with entities customer, product, order, order item, Seller, category, payment, Delivery, Address, specify primary keys composite and multi value attributes, weak, entities, specialization of product and participation Constraints.

### ER Diagram

Objective: To identify entity involved in e-commerce system  
To identify attributes and primary key of each entity

To establish relationships between entities

#### Entities

- Customer
- SELLER
- Product
- CATEGORY
- ORDER
- ORDER ITEM
- Payment
- Address

#### Cardinality

- customer  $\rightarrow$  ORDER = 1:N
- ORDER  $\rightarrow$  ORDER ITEM = 1:N
- Category  $\rightarrow$  product = 1:N
- CUSTOMER  $\rightarrow$  Address = 1:N
- Payment  $\rightarrow$  Order = 1:N
- ADDRESS  $\rightarrow$  order = 1:N
- SELLER  $\rightarrow$  Product = 1:N

### Result

The ER diagram for the Indian E-commerce platform was successfully designed by identifying the required entities, attributes, relationships and cardinality.
